A Captured Landmark Moment: The Foundation of Anama CHPS Compound is Complete!

We are thrilled to share the tremendous progress made towards the CHPS Compound project within Anama, a deprived community located 30km south of Nkoranza. Your unwavering support and collaboration have been the driving force behind the success of Phase 1, and we are excited to embark on the next phase of this life-changing initiative.

Phase 1: Construction of the Foundation

Achievements

During Phase 1, we accomplished significant milestones, including site clearing, landmarking, foundation trenching, and the successful procurement of essential building materials. We are optimistic about seamless community collaboration and support from donors and partners for the remaining four (4) phases. With efficiency and precision, the foundation construction phase is now complete! Together, we have laid the groundwork for a healthcare facility that will positively impact countless lives, improving their health and well-being.

The Power of Community Collaboration

The heart of this project lies in the unyielding support and involvement of the Anama community. Their enthusiastic participation in various tasks, such as site clearing and foundation filling, has driven substantial cost savings and fostered a deep sense of unity and pride among us all. The estimated GH¢ 2000 in savings reflects the incredible financial benefits of our collective efforts and the true value of community empowerment and engagement.

Health care Facility for the Anama community in Ghana

The Anama Community under the Nkoranza South District in the Bono East Region of Ghana has been without a health facility for many years. Critically ill children and other community members must travel long distances to access primary medical care.

This situation is even worse during the rainy season as Anama is cut off from the other communities in the District. This has negatively impacted Child Health indicators such as neonatal mortality, infant mortality, child mortality rates, etc.

As every country strives to attain Sustainable Development Goal three (SDG 3) of ensuring healthy lives and promoting well-being for all ages, HOPE for little lives has identified the need for a CHPS compound to be built in the Anama Community.

Phase 2: Construction of the Fundamental Structure

The initiation of this phase marks a significant milestone in our construction journey, progressing seamlessly from the foundation's successful completion. The principal objective of this phase is to build the main structure all the way to the roof. We will be meticulously erecting walls, including pillars, to establish the fundamental structure of the CHPS Compound.

During Phase 2, we will continue our active engagement with the community as well as seek the support of generous donors and stakeholders. Together, through collective efforts, we can bring to life this vital healthcare facility, making a positive impact on the lives of the community by enhancing healthcare accessibility for all.

We reaffirm our commitment to maintaining the highest standards and safety protocols. Together, we will set realistic targets and milestones, carefully considering factors such as resource availability, construction complexities, and ongoing community engagement. Your continued collaboration will be pivotal in sustaining the momentum and ensuring the long-term success of this meaningful endeavour.

Keys to Continued Success

1. **Strengthen Community Engagement:** We will foster open communication through regular meetings and updates, ensuring that everyone remains informed and engaged in the project's progress.
2. **Optimise Material Utilisation:** By monitoring material usage and minimising waste through inspections and supplier coordination, we can make the most of our resources.
3. **Proactive Problem-Solving:** Challenges will inevitably arise, but with proactive and collaborative problem-solving, we can overcome any hurdles that come our way.

Gratitude and Appreciation

We extend our heartfelt gratitude to the entire community, our tireless team, and our generous supporters for their unwavering assistance and cooperation. Together, we are making a tangible difference in the lives of the Anama community, setting an example of unity and progress that inspires us all.

The CHPS compound project aims to create a brighter future for the people of Anama and surrounding communities. Your donation will nurture accessible healthcare, turning dreams into reality. Together, we will create a symphony of hope that resonates across the Anama community, enriching lives and touching souls.

Donate today at the link: <https://www.gofundme.com/f/health-care-facility-for-anama-community-in-ghana>. Together, let's bring health and hope to those in need.

About Us

HOPE for little lives is a non-profit organization which seeks to bring HOPE to little lives and their families through:

H- Healthcare

O- Outreach

P- Personal Grooming

E-Education

Our dedicated team works tirelessly to ensure that every aspect of a child's well-being is nurtured, helping them flourish and grow to their full potential. Through a holistic approach, we strive to make a lasting impact on the lives of children, offering them a brighter and more promising future. Together, we build a community where every child can thrive, where their health is safeguarded, their minds are enriched, and their spirits are uplifted.
